	Our P3&4 students, on the other hand, will participate in a fully-subsided, 3-hour after-school training session conducted by external trainers to develop problem-solving skills. They will learn to brainstorm solutions that are sustainable and eco-friendly to address common issues found in their daily lives. Finally, the students will be given opportunities to create a physical example which emulates the solutions they have proposed. Parents may indicate their interest for their children to participate in this after-school programme via the online PG consent form that will be sent out from 19 May onwards.
